How to setup with Alexa Echo?

1. Power on Device with any Micro USB cable.
2. Make sure you already input your home/office WIFI profile into the device and device is locate at same 2.4 G network as Alexa Echo device. Please power cycle Alexa Echo device.
3. Go to Alexa App to click +Add Device or Discover.
4. Now you can ask Alexa to turn on **FLUSH TOILET**

If you change device name, you have to do power cycle device and do Step 3 again.

5. That's it and enjoy!
